

PCS-Series Residential Ozone Systems

The **OZOTECH PCS-Series** ozone generator reliability and ruggedness have allowed the PCS-Series to withstand the test of time and to emerge as the top selling ozone generator in the world over the past 25 years.

The OZ1PCS & OZ2PCS Models deliver up to 0.45 grams per hour of ozone when connected to an oxygen feed supply. And up to 0.2 grams per hour when dry air is used.

The OZ4PC10 Model delivers up to 1 gram per hour of ozone when connected to an oxygen feed supply. And up to 0.5 grams per hour when dry air is used.

The patented, OZOTECH, cold spark corona discharge tubes provide reliable ozone production even in the most hostile environments. These models will provide years of service with easy maintenance. 115 or 230 VAC models are available in 50 or 60 Hz configurations.

Ozotech PCS-Series
Ozone Systems

Benefits

- Compact size
- Lightweight and corrosion resistant
- Easy to service
- High reliability
- Simple and reliable operation

Standard Features

- Patented "Cold Spark" corona discharge
- Field serviceable corona cells
- CSA/US certified for consumer safety
- Lightweight aluminum chassis
